

# Deploying Read&Write for Mac

## Let's Get Started

### Step 1.

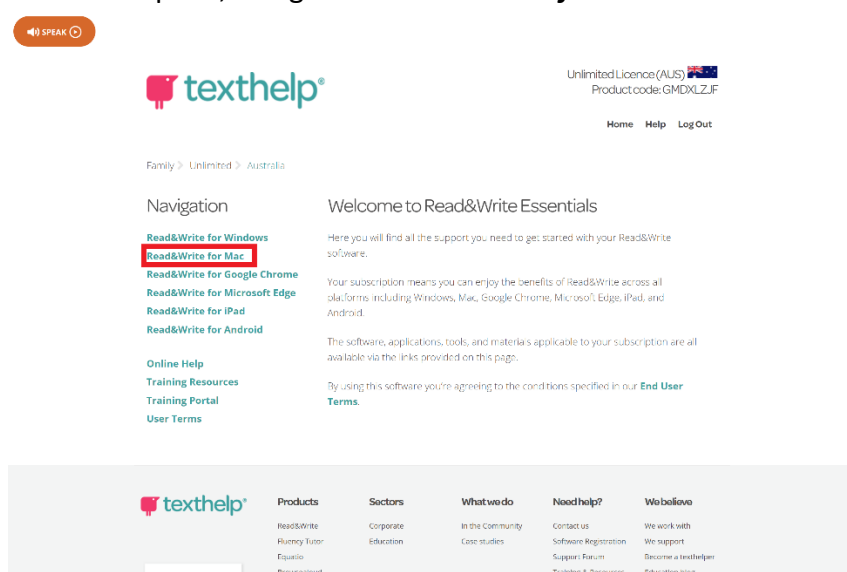

Log in to our essentials website with your product code:

<https://essentials.texthelp.com/>

### Step 2.

On the left pane, navigate to **Read&Write for Mac**

### Step 3.

On the left-hand side, click on **Deployment**

Family > Unlimited > Australia > Read&Write For Mac > Deployment

### Navigation

- Read&Write for Mac**
- Installer
- Deployment**
- Take home
- Additional voices
- Quick Reference Guide
- Video Tours
- <<< Previous menu

### Deployment

With an unlimited subscription, Read&Write can be easily pushed out to all your users. This means...

- No need to manage groups of users, saving time and effort
- Easy and simple to deploy software
- Only one point of contact required to manage your account

To get started with deploying and managing your Read&Write software, please refer to the following support article: [Deploying And Licensing Read&Write For Mac](#)

[Download your Read&Write Mac deployment package here.](#)

## Step 5.

The Read&Write .pkg file should begin downloading

Once its complete, you can now push it out to each of your machines using a deployment tool of your choice
